Section 1: Individual Distribution Corners

Corner Code No. refers to an alphabetical numerical coordinate number derived from the system of section numbers. Single points or other corner points must clearly show

corners such as corner for corner, single corner, witness point, etc. which fall on one line only will be identified by the code number under the corner falling between 5 and 6 on line 5 would be identified 5 and 6 corner for corner. The corner between lines 3 and 4 would be designated E 3 4. Corners common to two or more townships will be properly coded and filed in each township affected.
