DESCRIPTION OF PROPOSED WORKS

One or more wells 2000 feet deep with pumps and heat pump to points of use.

DEVELOPMENT SCHEDULE

BEGIN PROJECT BY THIS DATE: Started	COMPLETE PROJECT BY THIS DATE: August 1, 1986	WATER PUT TO FULL USE BY THIS DATE: August 1, 1988
--	--	---

PROVISIONS

Flowing wells shall be so constructed and equipped with valves to ensure that the flow of water can be completely stopped when not being used. Likewise, the well shall be so maintained as to prevent the waste of water through leaky casings, pipes, fittings, valves, or pumps--either above or below land surface.

Permittee is advised that notice of proof of appropriation of water (under which final certificates of water right issues) should not be filed until the permanent diversion facilities have been installed together with a mainline system capable of delivering the recommended quantity of water to an existing or proposed distribution system within the area to be served.

At such time that the Department of Ecology determines the regulation and management of the subject waters is necessary and in the public interest, an approved measuring device shall be installed and maintained in accordance with RCW 90.03.360 and WAC 508-64-020 through WAC 508-64-040.

A well log of the completed well shall be submitted by the driller to the Department of Ecology within thirty (30) days of completion of this well. This well log shall be complete and all information concerning the static water level in the completed well, in addition to any pump test data, shall be submitted as it is obtained.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule. To give notice to the Department of Ecology on forms provided by that Department, documenting such.

Witness my hand and the seal of this office at Olympia Washington, this 26th day of February 1982.

DONALD W. MOOS, Director
Department of Ecology

by E.W. Asselstine, Regional Manager
