A Federal law requires that not less than \$100 worth of labor must be performed on a mining claim annually to hold the necessary right to the claim. The period within which the work is required to be done commences at 12:00 o'clock noon on the 1st day of September succeeding the date of location of the claim. The applicable state law should be examined to determine all requirements for an Affidavit of Proof of Labor or Improvements and the time allowed for filing affidavits since requirements and time vary from state to state. IMPORTANT NOTICE: A mining claim is deemed abandoned under 30 U.S. Code Sec. 2261 unless a copy of the official record of an affidavit of assessment work performed, a notice of intention to hold a mining claim, or a stipulated report under 30 U.S. Code Sec. 201 is also filed annually for re-creation with the state office of the Bureau of Land Management in the state where the claim is situated on or before September 30th of each year following the calendar year in which the claim was located. Because BLM records on regulations change periodically, you should obtain re-creation regulations from your local BLM office to determine effective requirements for mining claims. Additional regulations of the BLM and Forest Service may apply to the conducting of mining operations on National Forest and BLM administered lands.
