Current Use Farm/Ag management plan for 22.44 Proposed changes:

acres; 20.30 acres to remain under Classified

Forest Land.

It is my understanding, having talked with David O'Brien and Bob Starke, U.S.F.S.W on November 4, 1888 in Hood River OR., that the above stated property with proper approval from the Départment, of Natural Résources and that of the United States Forest Service, will be able to follow the Washington State . Forest Practices Act.

Reference was made by Mr. O'Brien as to the lay of the land; growth and harvest of trees under the Classified Forest Land program would not be encumbered by the Scenic Act view shed restrictions.

Subject to future review by this office with concern to commercial use and income data to be required periodically from the property cuner; and subject to any changes or added, restrictions concerning the Columbia River Gorge National Scenic Act on this parcel; the following changes are accepted for transfer and/or application into the Current Use Farm and Agricultural classification:

acres will be accepted into C.U.F/AG program

12.44 acres will be transferred into the C.U.F/AG program

2030 acrés will remain in the Classified Forest Land program

It is determined in Mr. Thompson's case that the U.S.F.S. Scenic Easement will not restrict the property owners proposed plan for the agricultural use of this parcel.
