MARK THE CORNER LOCATION BELOW AND FILL IN THE CORNER CODE BLANK ON THE OTHER SIDE;  
 For corners at the intersection of two lines, the corner code is the alphanumeric  
 coordinate that corresponds to the appropriate intersection of lines.

For corners that are only on one line, the corner code is the line designation and the  
 related line segment; i.e., a corner on line 5 between "B" and "C" is designated BC-5.

For corners that are between lines, the corner code is both line segments; i.e., a  
 corner in the SE1/4 of the SE1/4 of section 18 is designated MN 4-5.
