

#25 - Refuse Conveyor System - (continued)

One (1) Conveyor from under edger to above unit, #78 chain, steel trough, typical drive with Radicon worm gear unit and 5 H.P. motor,

Chipper Conveyor

One (1) 14"x18' Belt conveyor with 15x13" steel trough, flared side to floor under trimmer, 16" steel end and snub idler drums with 2 3/16" ball bearing boxes, typical drive with Radicon worm gear unit and 5 H.P. motor.

Conveyor from Planing Mill to Chipper

One (1) Single chain and flight conveyor from under trim saws in Planing Mill to inside Sawmill, runs below ground in concrete tunnel through Yard, approximately 130' long with C-131 combination chain, steel trough of 2 runs 4" angle and 1 run 4" channel with wood side extensions, steel return trough, 14" head sprocket on 2 7/16" shaft with roller bearings, typical drive with Radicon worm gear unit and 5 H.P. motor.

Chip Bin Conveyors

One (1) 54' Long drag conveyor in bottom of 52' long surge bin, #H110 refuse chain in metal lined wood trough, 6' flared trough side extension to form surge bin with ends and steel discharge flow gate 1 end, plain sprockets, typical reducer drive with size 7 Radicon reducer and 10 H.P., 1800 R.P.M. 220/440 V. Century induction motor #10AA45931.

One (1) 45' Long #78 chain and flight distributing conveyor above surge bin, steel frame with 3" angle stringers, typical drive with Radicon reducer and 5 H.P. Delco induction motor #8-56.

#26 - Tools and Miscellaneous Equipment

One (1) Lot miscellaneous equipment including chain saw, fire extinguishers, miscellaneous mill tools, filing room tools, etc.
