Exposure with ultraviolet light, and a rather heavy, but frequently sufficient, amount of secondary radiation, is all that is required for the formation of these shapes. When very thin, flat, or thin plates of matter become transparent, the light which is absorbed is re-emitted, giving rise to fluorescence. This is the basis of the combination with phosphors of a primary, direct, or indirect, type of light source to produce the fluorescence of the phosphor.

1. SECURITY. This Mortgage is given to secure the payment of Dollars (\$) (called the "Loan") with interest as provided in the note which evidences the Loan. It also secures payment of certain fees and costs of Bank as provided in Section 6 of this mortgage, and

"mortgage" is a legal term which means to give to someone, in this case the Bank, a "lien" or "preferred right" to recover money you owe them and do not pay by selling the property you have "mortgaged." The "Mortgage" is the document which is evidence of this right and the "Mortgagor" is the person or persons who give the right to the Bank and who sign the Mortgage.
