TIMBER MANAGEMENT PLAN

GENERAL CONSIDERATIONS:

The timber management plan described will encompass an area of approximately 150 acres, and will include the area in Skamania County Washington, subdivision southwest one quarter, southeast one quarter, section thirty-three, township two north, range five east, west meridian, an area approximately seventy-four acres, and also include tax lot 1250, an area of approximately fifty-seven acres. The two areas will be encompassed by the same plan, but do not join with each other geographically. The timber management plan is aimed at improving the quality of the tree, and enhancing the life span and increase the total number of trees, and improve the spatial relationship of them. The type of tree primarily considered in this plan will be the Douglas fir, the cedar, and the hemlock. The plan will have two phases, the first phase will be thinning and reforestation, and the second phase will deal primarily with transplantation of trees within the tree farm itself.

PRIMARY REFORESTATION:

This part of phase one will include the actual planting of small Douglas fir trees at a number approximately one thousand a year for three years, starting in 1974 to and including 1977. These trees will be checked on a tri-annual basis for survival, hardiness, and will be trimmed according to their needs.

SECONDARY REFORESTATION: This part of phase two will deal with the removal of certain small trees, and re-planting them within the forest management area to improve the spatial relationship of the tree, and improve its quality. This will be done on an ad lib basis and the area will be checked approximately every year for new growth, and trees to be moved will be marked, and a report will be submitted to the Forestry Service every five years.

TREE REMOVAL:

Scrub trees such as alder will be removed in order that Douglas fir and cedar and hemlock trees can be planted in their place. Since this type of growth tends to over run the area, certain areas will be cleared to provide areas for the above trees to be planted.
