

TIMBER MANAGEMENT PLAN

E.A.Price - Skamania County.Washington

1. 44.57^{Acres} Second growth timber, approx. 35 yrs. will be thinned as a continuing program.
2. 31 Acres is all in young trees projected for timber and forest products. Currently these trees are being cut on a selected basis for Christmas trees to sustain capital expense. A larger share of these trees(not suitable for xmas trees) will be left for timber and bough cutting. Xmas trees will become to expensive to market so we expect a bough market to suppliment.
