The review of membership for 1970, held in April of the previous year, and the 1971 review, held in April of the previous year, both showed a decline in membership. The 1970 review showed a decline of 10% and the 1971 review showed a decline of 15%. The decline in membership was attributed to a number of factors, including a decline in the number of new members joining the organization and a decline in the number of members who remained active in the organization.
