

Diversion intake shall be tightly screened at all mines with wire mesh having openings with dimensions not greater than .125 (1/8) inch. Water approach velocity to the screen shall be less than 1 foot per second and approaching 0.5 foot per second, as measured one foot in front of the screen.

The Water Resources Act of 1971 specifies certain criteria regarding utilization and management of the waters of the State in the best public interest. Issuance of this certificate was based on sufficient waters available, at least during portions of the year. However, it is pointed out to the certificate holder that his use of the water may be subject to regulation at certain times, based on the necessity to maintain water quantities sufficient for preservation of the natural environment.

The right to the use of the water of record hereby confirmed is restricted to the lands or place of use herein described, except as provided in RCW 9A 03 380, 9A 03 391, and 9A 44 020

This certificate of water right is specifically subject to relinquishment for nonuse of water as provided in RCW 9A 14 130.

Given under my hand and the seal of this office at Olympia, Washington, this 5th day of March, 1976

JOHN A. BIGGS, Director
Department of Ecology

ENGINEER REG. NO. 1000
