Diversion intake shall be tightly screened at all times with white mesh having openings with dimensions not attact than 0.125 (1/8) inch. Water approach velocity to the screen shall be less what I toot per second and approaching 0.5 foot per second, as measured one foot in from of the screen.

The Water Resources Act of 1971 specifies certain criteria regarding utilization and management of the waters of the State in the best public interest. Issuance of this certificate was based on sufficient waters available, at least during portions of the year. However, it is pointed out to the certificate holder that his use of the water may be subject to regulation at certain times, based on the necessity to maintain water quantities sufficient for preservation of the natural environment.
