## FENCELINE AGREEMENT

We, the undersigned landowners, hereby enter into the following agreement regarding the fencelines which exist near our property lines within the East Half of Section 16, Township 3 North, Range 10 East, W.M., as surveyed by Trantow Surveying of Bingen, Washington, between March and July, 1983;

It is our desire to not have the existing fencelines become a line of possession or a line of contention with our neighbors; it is also our desire to see any fencelines eventually erected along the true line as now surveyed;

Therefore, we the undersigned agree that the lines as now surveyed are our true lines; that we will not claim any rights to adjacent fencelines as they now exist; that as fencelines must be repaired and/or replaced, they may be moved to the true line without objection from the adjacent landowners if they have also signed this agreement;

We understand that unless the adjacent landowner along a common fenceline also signs this agreement, such agreement may not be valid depending on the location of the fenceline in relation to the true line;

We therefore sign this agreement under the above conditions on the date shown.
