Subject 3253—Sewage and plots

§ 306.1.1 Success of regulations.

§ 306.1.1-1 Application for review.

The claimant is required, in the first place, to have a correct survey of his

claim made under authority of the proper judicial officer, such survey to show with accuracy the exterior surface boundaries of the claim, which boundaries are required to be distinctly marked by monuments on the ground. He is required to have a correct survey where patent is applied for and where the mining claim is in vein or lode formation, or where lands not surveyed in accordance with the U.S. system of rectangular survey or where the mining claim fails to conform with the local subdivisions of the Federal survey. Application for such a patent of survey should be made to the appropriate land office (see §§ 23-1 of this chapter).

[Cir. 2720, 31 Dec. 1973, Dec. 31, 1976]

§ 5561.1-2 Survey must be made subsequent to recording notice of location.

The survey and plat of mineral claims required to be filed in the proper land office with application for patent must be made pursuant to the requirements of the location of the claim under the laws of the State or the regulations of the mining district require the notice of location to be recorded, and when the original location is made by survey of a mineral discovery such location survey cannot be substituted for that required by the statute, as above indicated. All matters relating to the duties of mineral surveyors, and to the field and office work are to be observed in the execution of mineral surveys, and set forth in Chapters 10 of the Manual of Instructions for the Survey of public lands in the United States, 1894.

§ 386.1-3 Plate and field notes of
cultural survey.

When the patent is listed, one copy of the plot and field notes shall accompany the patent and be delivered to the patentee.

Survey specific

§ 3361.2-1 Particulate to be observed in mineral water.

(c) The following particulars should be observed in the survey of every mine-
ing place:

(1) The exterior boundaries of the claim, the number of feet claimed along the vein, and, as nearly as can be ascertained, the direction of the vein, and the number of feet claimed on the vein in each direction from the point of discovery or other well-defined place on the claim, should be represented on the plat of survey and in the field notes.

(2) The intersection of the lines of the survey with the lines of radiating prior surveys should be noted in the field notes and represented on the plat.

(9) Conflicts with uncontroverted claims, where the applicant for survey does not claim the area in conflict, should be shown by actual survey.

(4) The total area of the claim embraced by the exterior boundaries should be stated, and also the area in conflict
