

Of the Willamette Meridian.

The permission hereby granted is upon the following expressed condition.

1. the transmission lines constructed hereunder shall be constructed in a good, substantial and workmanlike manner and under the supervision and subject to the approval of the Chief Engineer of the Railway Company, and all wires erected hereunder for the transmission of electrical current shall be maintained upon said premises in a safe and secure method, to the approval of the Chief Engineer of the Railway Company, and in the event that the Electric Company shall elect to erect its lines on a double line of poles, said lines shall be parallel and not more than fifty (50) feet apart, and poles or towers of each line shall be located opposite the poles of the other line.

2. Immediately upon the completion of the lines above described the Electric Company shall furnish to the Chief Engineer of the Railway Company a vicinity map showing the exact location of said lines and diagram showing the method of construction, and if said the said Chief Engineer shall not approve the location and work of construction as shown on said maps, the Electric Company shall forthwith proceed to change said location or method of construction to conform to the directions of such said Chief Engineer.

3. The Electric Company agrees to hold harmless the Railway Company, its officers, agents, employees, successors and assigns, from any and all claims and demands of every nature whatsoever that may be made by any person or persons whomsoever on account of injury to the person or damage to property arising directly or indirectly from the construction, maintenance, use or operation of said transmission line or lines, whether the same shall have been approved by the Chief Engineer of the Railway Company, or not.

4. If the use by the Railway Company of its property over which the Electric Company is hereby permitted to construct and maintain such transmission lines shall at any time make it necessary, convenient or desirable in the judgment of the Chief Engineer of the Railway Company that the location of such transmission lines be changed, the same shall, upon notice of the Railway Company, be changed forthwith at the sole cost and expense of the Electric Company to such new location over and across the lands of the Railway Company as shall be designated by the Railway Company; PROVIDED, HOWEVER, that if in the event of such change of location the Railway Company shall be unable on account of its use of the said lands to designate a new location for such transmission lines over and across its said lands, then this permit shall cease and determine.

5. The permission hereby granted is hereby declared to be personal to the Electric Company and the right hereby granted shall not be assigned or transferred by the Electric Company without the written consent of the Railway Company.

6. If the Electric Company shall at any time fail or neglect to perform any of the agreements herein contained to be performed by it or maintain said transmission lines as herein provided, the Railway Company, its successors or assigns, may forthwith terminate this permit and forthwith expel the Electric Company, its officers, agents, servants and employees from its premises.

7 The Electric Company assents to all of the foregoing conditions and agrees to abide by the same.

IN WITNESS WHEREOF the parties have caused these presents to be executed the day and year first above written.
