PROPERTY DESCRIPTION

A tract of land lying in the Southeast one quarter (S.E. 1/4) of Section Four (4), Township Two (2) North, Range Six (6) East of the Willamette Meridian, Shanama County, Washington, the aforesaid tract being more particularly described as follows:

Commencing at the Southeast corner of said Section 4; thence North 59° 55' 45" East 1287.45 feet to the true point of beginning; thence North 51° 52' 20" West 300.00 feet; thence North 37° 07' 40" East 300.00 feet; thence South 52° 52' 20" East 300.00 feet; thence South 37° 07' 40" West 300.00 feet to the point of beginning and terminus of this description.

SUBJECT TO: An easement for an existing access road over and across the above described tract, the centerline of said road being more particularly described as follows:

Beginning at a point on the Southeastern line of the above described tract, bearing said point being South 37° 07' 40" West 77.67 feet when measured along said line from the most Northerly corner of said tract, thence leaving said line and bearing said line South 43° 09' 00" West 106.93 feet to a point on the Northerly line of the above described tract, thence leaving said line and bearing said line South 37° 07' 40" West 20.06 feet when measured along said line from the most Northerly corner of said tract.

W.O. #5215
October 29, 1976

FIELD NOTES: A survey for the Washington State Department of General Administration of a tract of land in the Southeast 1/4 of Section 4, Township 2 North, Range 6 East, Willamette Meridian, Skamania County, Washington.

CREW: Lawrence E. Jones, Partychief
Rod McKee, Chainman

DATE COMPLETED: July 12, 1976

On October 24, 1975, Mr. Robert V. Reeves of the Washington State Department of General Administration retained our firm to survey a tract of land in the Southeast 1/4 of Section 4, Township 2 North, Range 6 East, Willamette Meridian, Skamania County, Washington. The purpose of this survey was to establish the boundaries of a communications microwave site.

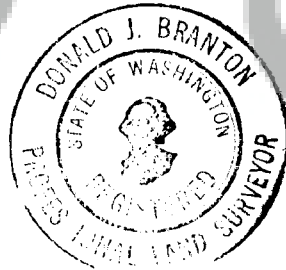

On July 9, 1976, we started the survey by surveying the perimeter of the site and setting corners at the required distances, the approximate location of which had been previously marked by Mr. Reeves.

A traverse was run on an existing access road across the site. This road provides access to Bonneville Power Administration McNary-Ross transmission line.

A tie was made to the Bonneville Power Administration McNary-Ross transmission line as a basis for bearings. This tie was also used to compute the location of section corners.

Corners found and established in the course of the above survey, together with measured bearings, distances, and ties, are shown on the attached map, Tenneson Engineering Corporation Work Order No. 5215, which by reference is made a part hereof.

I certify this survey was done under my direct supervision.

Signed

Donald J. Branton
