TRaverse & NARRATIVE STATEMENT: An open traverse was made to connect all found corners during the period October 11-15, 1991, using a 10" total station and related accessories. All measuring equipment met the state standards for this survey as per MAC 332-130-090. The southwesternly corner of Lot 16 was not recovered and was calculated from record data. All found corners were held except the iron rod near the southeast corner of Lot 16 which was nearly 8 feet West of an acceptable position. Calculation show that sideline (and the east edge of the subdivision) are not rays from the center of the curve, nor does curve data exactly fit street lines. No structure encroachment exist but some shrubbery along sidelines is off line as marked.
