My Commission expires June 10, 1996

* Federal law requires that not less than 100 feet of labor or improvements must be performed or improvements made on a mining claim annually to hold the possessory right to the claim. The period within which the annual assessment work must be performed is from 12:00 o'clock Meridian on the first day of September succeeding the date of location of the claim. Oregon law requires that the annual assessment work must be performed or improvements made on a mining claim annually to hold the possessory right to the claim. The period within which the annual assessment work must be performed is from 12:00 o'clock Meridian on the first day of September succeeding the date of location of the claim. Labor or making of improvements must be made by affidavit filed in the mining records of the county in which the mining claim is situated, within 30 days after the performance of labor or making of improvements.

IMPORTANT NOTICE: A mining claim is deemed abandoned under 43 U.S. Code Sec. 1744 unless a copy of the official record of an affidavit of assessment work performed, a notice of intention to hold a mining claim, or a detailed report under 30 U.S. Code Sec. 28-1 is also filed annually for recordation with the state office of the Bureau of Land Management in Portland on or before December 30th of each year following the calendar year in which the claim was located. Because BLM recordation regulations change periodically, you should obtain recordation regulations from your local BLM office to determine effective requirements for mining claims. Additional regulations of the BLM and Forest Service may apply to the conducting of mining operations on national forest and BLM administered lands.
