TRAVERSE STATEMENT & NARRATIVE:
A closed field traverse for the line and corners shown was made with a 10" total station and related measuring equipment, all of which met state standards (WAC 332-130-090) at the time of this survey. Acceptable raw closure of 1:5000 or greater was balanced by compass adjustment procedure to effect mathematical closure. Field work for this project was conducted during the period of March 9 - May 11, 1994, the purpose of which was to set the corners and mark the line as shown. No encroachments were noted during this survey.
