GARY M. NELSON

SURVEY IN NE 1/4 NW 1/4 SEC. 29, T.3 N., R.8 E., W.M.

TRAVERSE STATEMENT & SURVEY NARRATIVE: A closed field traverse for the parcel shown was made with a ten-second total station and related measuring equipment, all of which met state standards (MAC 332-130-090) at the time of this survey. Acceptable raw angular and distance closures in excess of 1:5000 were balanced by compass adjustment where necessary to effect mathematical closure. No encroachments, except where noted, were found during this survey, the purpose of which was to establish property corners and mark all boundaries for timber harvest. Evidence of an old cutting line along the north parcel boundary fit precisely with the present line. All lines were flagged except at roadways. Field work was conducted during the period of March 18-April 2, 1996.
