Consideration is \$4,500.00

CORRECTED
EASEMENT

The original easement was recorded in Skamania County, Washington on August 25, 1997, in Book 168, Page 504.

KNOW ALL MEN BY THESE PRESENTS, That the United States of America, Department of Energy, Bonneville Power Administration (BPA) does hereby grant unto Thomas J. and Corrine A. Tucker (hereinafter called the Grantee), and their assigns, an easement for ingress, egress, and underground utilities over, upon, across, and under BPA's fee-owned North Bonneville-Troutdale Lines 1 and 2 in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 26, Township 2 North, Range 5 East, Willamette Meridian, Skamania County, Washington, said fee-owned property having been acquired by Declaration of Taking No. 26, Volume 27, Page 319, dated February 6, 1939, Auditor's File 26973, Skamania County, Washington; said easement being more particularly described as follows:

An easement over and across an existing road in Fee Tract BV-37 of the Bonneville Power Administration (BPA) North Bonneville-Troutdale No. 1 and 2 transmission lines 300-foot wide right-of-way in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 26, Township 2 North, Range 5 East, Willamette Meridian, Skamania County, Washington. Said road lies between McCloskey Creek Road at centerline station 573+70 of the BPA North Bonneville-Troutdale No. 2 transmission line and traverses said 300-foot wide right-of-way southeasterly to a point 67.5 feet southerly of and opposite centerline station 566+20 of the BPA North Bonneville-Troutdale No. 1 transmission line and termination of said easement.

The above-described easement contains 0.3 acre(s), more or less, and is shown on a segment of BPA Drawing No. 3372, marked Exhibit A, attached hereto, and by this reference made a part hereof.

Subject to outstanding rights.

Subject also to the following conditions:

1. Maintain a minimum distance of 15 feet between construction equipment and transmission line conductors (wires).
2. Storage of flammable materials or refueling of vehicles/equipment is prohibited.
3. Maintain a minimum distance of at least 50 feet between your facilities and the point where the transmission line steel lattice structure enters the earth. If this clearance cannot be met, install guard devices such as barriers, guardrails, or posts, for the protection of BPA's structures. Specifications and installation plans for these protective structures must be submitted to and approved by BPA prior to construction. Barriers should be put up to protect structures 10/4 of the No. 1 line and 10/4 of the No. 2 line from logging trucks.
4. Nuisance shocks may occur within the right-of-way. Grounding metal objects helps to reduce the level of shock.
5. Access to transmission line structures by BPA's maintenance crews shall not be interfered with or obstructed.
6. Bury the cable with a minimum cover of 36 inches. Construct and maintain the cable to comply with applicable national, state, or local standards.
7. Mark the location of the underground utilities with permanent signs, and maintain such markings, where they enter and leave BPA's right-of-way, and at any angle points within the right-of-way.
8. Restore BPA's right-of-way to its original condition, or better following construction. No grade changes to facilitate disposal of overburden shall be allowed. If the design of the road requires cutting or filling, the elevations of the proposed finished grade and original ground grade shall be submitted to this office for final approval.
9. Grade changes to existing ground elevations are not permitted. If grade changes are required, you must submit grading plans to this office for further approval by BPA. These plans should clearly indicate proposed finished elevations as well as existing ground elevations.
10. Equipment, machinery, and vehicles traveling on BPA's right-of-way shall come no closer than 50 feet to any BPA structure.

11. BPA shall not be liable for damage to your property, facilities, or injury to persons which might occur during maintenance, reconstruction, or future construction of BPA facilities as a result of your facilities being within the right-of-way.
12. Damage to BPA property, resulting from your use, shall be repaired or replaced by BPA at its option. The actual costs of such repair or replacement shall be charged to and paid by you.
13. Construction/installation, use, and maintenance of the road or utilities shall be at no cost to BPA.
14. Should your use interfere with the construction, use or maintenance of said lines, you shall be required to remove such interference at no expense to BPA.
15. Modification of your present use requires BPA's written approval prior to implementation.

This easement shall not interfere with any use by the United States of America of its fee-owned property.

You should be aware that: (a) Immediate access may be required during power outages or other emergency situations resulting in the destruction or removal of fences or structures on the right-of-way; and (b) BPA will NOT be liable for any damage to your property which might occur as a result of maintenance activities.

Grantee, and its assigns, shall be responsible for and comply with all procedural and substantive environmental requirements imposed by local, State or Federal laws or regulations applicable to the facility. Grantee, and its assigns, shall notify BPA in a timely manner any reportable release of hazardous substances or breaches of environmental requirements and shall mitigate and abate adverse environmental impacts of its actions. Grantee, and its assigns, shall hold BPA harmless for any and all liability arising from the violation of such requirements by Grantee, and its assigns. Violations of such requirements by Grantee shall make this agreement voidable at the election of BPA.

Reserving unto the United States of America, and its assigns, the right to operate, maintain, rebuild, and upgrade existing electric transmission lines and to erect, operate, maintain, rebuild, and upgrade future transmission and communication lines over, under, and across the easement area.

Reserving also unto the United States of America, and its assigns, the right of access to and along its fee-owned property.

The Grantee, and their assigns, shall be liable for any damage to the property of the United States of America, including transmission lines and structures, arising out of or resulting from any act or omission of the Grantee or its employees, agents, or assigns acting within their authority in the construction, reconstruction, or maintenance of said ingress, egress, and underground utilities upon the fee-owned property of the United States of America.

TO HAVE AND TO HOLD the above-described easement unto Thomas J. and Corrine A. Tucker and their assigns, forever, **EXCEPT**, should the rights granted herein no longer be used or needed for the purposes defined in this easement for a consecutive two-year period, or be abandoned, then upon written notice by the United States of America to the Grantee, or assigns, all rights granted by this easement shall automatically terminate and the title thereto revert in the United States of America.

The true and actual consideration for this easement is \$4,500.00.

This conveyance is made pursuant to the Acts of August 20, 1937 (50 Stat. 732, 16 U.S.C. § 832a), as amended and October 23, 1962 (76 Stat. 1129, 40 U.S.C. § 319) and regulations and delegations of authority issued pursuant thereto, it having been determined that the granting of this easement will not be adverse to the interests of the United States of America.

Dated at Portland, Oregon, this 19th day of August, 1998.
