TRAVERSE STATEMENT: A closed loop field traverse for the parcel shown was made with a Sokkia five-second total station and related measuring equipment, all of which met State standards of WAC 332-130 at the time of this survey. Acceptable raw angular and distance closures in excess of 1:10000 were balanced by compass adjustment to effect mathematical closure. Physical appurtenances which may be in conflict with existing conditions or items of record are noted as shown. Field work was conducted during the period of September 4--10, 2002.

SURVEY NARRATIVE: The Northeast quarter of Section 10 was recalculated using Reference 1 and the subsequent tie to the found North 1/4 corner (Ref. 2). The difference was relatively small, with little effect on any line trees.
