RCW 4.96.020 Notice of Claim

December 29, 2004

Mike Garvison
Auditor
Skamania County
PO Box 790
Stevenson, WA 98648

Re: Our Client: Aaron J. Blouin (a minor)
Date of Injury: September 2, 2003

Dear Mr. Garvison,

Pursuant to RCW 4.96.020, this is notice of claim against Skamania County.

1. **Location and description of conduct and circumstances which brought about the injury or damage:**

Aaron J. Blouin was properly inside the Skamania County Courthouse on September 2, 2003, leaving the courthouse. When he approached the door to leave, he pushed down on the bar to open the door and his hand slipped off the bar and he fell head first through the glass window in the door, slicing open his neck.

2. **Description of the injury or damage:**

Mr. Blouin was Life-Flighted to Emanuel Hospital with severe injuries. He sustained a large laceration to his neck with exposed vessels. His diagnosis was a 6 cm neck laceration, 2 cm auricular laceration and sternocleidomastoid muscle laceration. He lost an estimated 150 cc's of blood.

At the Trauma Center, Mr. Blouin was taken directly to surgery due to an "expanding hematoma in his neck." During surgery Dr. McGuigan found multiple small bleeding vessels around the lacerated sternocleidomastoid muscle. The vessels, including the carotid artery and the internal jugular vein were exposed. The massive wound was stapled shut. Throughout the next two days, Mr. Blouin was in recovery at the hospital,

on a constant Morphine drip and antibiotics. The staples in Mr. Blouin's neck stayed until September 10, 2003.

3. Time and place of the injury or damage:

September 2, 2003, time of day unknown.

4. Names of the person involved

Aaron J. Blouin.

5. **Amount of damages claimed**:

Total damages are unknown, but currently the amounts are:

Special Damages (Medical Bills)

Provider	**Amount**
Emanuel Hospital	$17,411.55
Lifeflight	$7,627.00
Seth Izenberg, M.D.	Unknown
Chris Kaufmann, M.D.	Unknown
Totals	**$25,038.55**

General Damages

$100,000

6. Actual residence of the claimant at the time of presenting and filing the claim:

Aaron J. Blouin
PO Box 622
Carson, WA 98611

7. **Statement of the residence of the claimant 6 months immediately prior to the time the claim arose**.

Aaron J. Blouin
PO Box 622
Carson, WA 98611

Boy crashes through door at courthouse

A 16-year-old boy injured his neck on broken glass, narrowly avoiding severing his jugular vein in a courthouse accident Tuesday, Sept. 2, sending him by LifeFlight to Legacy Emanuel Hospital.

The boy, whose name was not released, was reportedly rushing down the hall from the Skamania County Auditor's Office when he crashed through an inside double door.

The LifeFlight helicopter landed at Stevenson Elementary School to transport him. Skamania County Emergency Medical Services said his injuries were not that severe.

...The results are included in a ... first phase report of a study ... lyzing trade ... in Skamania County.

Continued on page 3

Lost huckleberry pick...

A 79-year-old man from The Dalles miraculously survived an eight-day wilderness ordeal on the Gifford Pinchot National Forest.

Duff Kimsey and his wife, Myrtle, were reportedly in the vicinity of the 41 and 43 roads picking huckleberries Aug. 28 when he disappeared.

His wife called the Skamania County Sheriff's Office the afternoon of Aug. 28 to report him missing.

After three days of intense ground and air coverage by searchers including Wind River Search and Rescue, Kittitas and Cowlitz volunteers and dog teams, the search was suspended Sept. 1.

They planned to resume the search last weekend after retracing the Kimseys' route.

On Thursday, Sept. 4, hunter Mark Swanson saw grouse crossing the 41 Road.

The University of Washington grad student had been taking a break from his work at the Canopy Crane.

He went to the edge of the road and looked, but what he saw was not a grouse. An arm feebly waved from 75 feet down the hill.

Kimsey was conscious but fading when rescuers reached him. He was taken by Life Flight to Legacy Emanuel Hospital in Portland.

When found, he was nine and one-half miles from where he had first been reported missing.

How had he survived? He hadn't been wearing a jacket, nor was he carrying water or food. But Kimsey is a former bush pilot and game warden in Alaska whose outdoor skills apparently saved his life.

CATEGORY/SUBCATEGORY	FINDINGS	NOTE
SUMMARY OF PROBLEMS/NEEDS (CRC)	: Summary of problems or needs Pt is 16 yo male trauma pt brought to ED by Lifeflight secondary to running through a plate glass window et sustaining a lac to neck. Upon arrival he states that his father has legal custody et that he is living with friends secondary to a current restaining order obtained by him against his father. His father, Donald Blouin was notified at the scene by friends father. Mr. Blouin comes to the hospital with copy of paperwork withdrawing the "no contact order". Copy provided to security et copy made for chart. Mr. Blouin also provides hx that he et pt 's mother were awarded joint custody of pt as part of divorce agreement "years ago". Pt has continued to have contact with mother but has been in physical custody of father until 16th birthday(June 6/29/03). Mr. Blouin et other family members are attempting to notify pt's mother re: admit. Pt to be admitted to 3529. will leave VM for Shannon Boreson LCSW advising of above. Will also resolve issue of pt's legal name. He told us he was "Justin" but is registered as "Aaron. Question was raised re: accidental vs. purposeful injury et reports from the scene confirm accidental.

PRE-PRINTED ORDERS

USE BALL POINT PEN, PRESS FIRMLY

ALL LISTED ORDERS ARE IN EFFECT UNLESS CROSSED OUT. **EXCEPTIONS:** ORDERS PRECEDED BY A BOX (☐) REQUIRE A (✓) TO INITIATE. ORDERS WITH BLANKS INDICATE ADDITIONAL INFORMATION IS NEEDED.

DATE:	TIME:	ORDERS: ANOTHER BRAND OF GENERICALLY EQUIVALENT OR APPROVED THERAPEUTICALLY EQUIVALENT PRODUCT MAY BE ADMINISTERED UNLESS CHECKED.	✓
9/2/03	17:10		

1. Admit to: Trauma To PACU pods → #3539
2. Admit status: ☒ Inpatient ☐ Observation (stable and admit for < 48 hours)
3. Condition: ☒ Fair ☐ Good ☐ Serious ☐ Critical
4. Primary attending physician: IZENBERG
5. Consultants: ☐ Orthopedics ☒ OMFS ☐ Neurosurgery ☐ Cardiothoracic ☐ Medicine ☐ Ophthalmology ☐ Psychiatry ☐ Cardiology ☐ Physiatry/Rehabilitation ☐ Spine ☐ ____ ☐ ____
6. Diagnosis: ZONE II Penetrating neck inj
7. Allergies: ☒ NKDA ☐ ____
8. VS q 4 hr with: ∞ NV checks ∞ GCS ____ Doppler pulses ____ SG hemodynamics ____ CVP ____ ICP with CPP ____ Ventriculostomy
9. Initiate standing ICU orders if admitted to a critical care bed.
10. Initiate Trauma Collaborative Practice Guideline Protocol.
11. Spine Clearance: ☒ All Spines cleared in ED by: IZENBERG ☐ All Spines not cleared in ED – See CTL Spine algorithm and continue the spine precautions. ☐ Other information ____
12. Activity: ☒ OOB ↑ ASST ☐ HOB up at least 30° SemiFowlers or 20° Reverse Trendelenberg Consider hemodynamic stability, spine clearance issues and neurologic issues.
13. Drains: a. ☒ Urinary drainage catheter (foley), routine care
    b. ☐ Nasogastric tube to ____, routine care
    c. ☐ Orogastric tube to ____, routine care
    d. ☐ Chest tube (right or left): ____
    e. ☒ Surgical drains: NECK (R) blake drain to bulb suction
    f. ☐ ____
14. Dressing changes: PER ROUTINE
15. I and O every 8 and 24 hours (every one hour if in critical care unit)
16. Nutrition: ☐ NPO ☐ Initiate standing nutrition collaborative practice. ☒ Diet: CLEARS → ADAT ☐ If not adequately eating an oral diet within 48 hours of admission, for any reason – order Nutrition consult. ☐ Tube feeding: Initiate and complete Enteral feeding order sheet. ☐ Abdominal Binder for all surgically or endoscopically placed GT or JJ tubes ☐ For TPN or PPN: Initiate and complete Parenteral order sheet.
17. IV: NS @ 120 cc/HR
18. DVT prophylaxis: ☒ SCD's ☐ Plantar pumps ☐ Anticoagulant protocol ☐ Anticoagulant other ____ ☐ ICU ultrasound surveillance: Duplex US PID#2 and q3d while in ICU. ☐ Trauma ward ultrasound surveillance: Duplex US q week
19. Weight(s) ☐ qd ☐ qod ☒ q week

Physicians or Credentialed Provider's Signature ____ PA-C Date: 9/2/03

All Pre-Printed Orders must have a Physician/Credentialed Provider's signature to initiate.

1. Admit to PACU. Routine vital signs per PACU protocol. (BP, Pulse, Resp. SpO_2, Temp).
2. Respiratory:
   - A) O_2 at 2-15 L/min. via appropriate route to keep O_2 Sat > 92%.
   - B) Naloxone 0.1 mg IV prn narcotic induced respiratory depression (Rate <8/min.) Repeat X 1 prn. Notify M.D.
   - C) Ventilator: TV_____ FIO_2_____ RATE_____ PEEP_____
     ABG 15 min. after ventilator initiated and prn. Extubate per PACU protocol.
   - D) Chest X-ray per policy.
3. Cardiovascular:
   - A) SBP > _____ mmHg or DBP > _____ mmHg.
     ☐ Nifedipine 10 mg. s l ☐ May repeat X 1.
     ☐ Labetolol _____ mg. IV q _____ min. up to _____ mg.
     ☐ Other: _____
   - B) BP < _____ / _____ mmHg 300ml IV fluid prn and/or Ephedrine 5-10mg IV and/or 25-50mg IM.
   - C) Monitor PRN: ECG/Art/CVP/PA/Wedge. Document strip for significant changes and HR <50 or >130, MAP <60 or >90, PAWP <10 or >20.
   - D) Arrhythmia's: Notify M.D. Follow ACLS guidelines. Significant PVC's: Lidocaine 1 mg/Kg IV.
   - E) Symptomatic bradycardia: Atropine 0.5mg IV. May repeat X 1.
   - F) If pt.'s BP continues to vary more than 30% from baseline, notify M.D.
4. Pain and/or sedation:
   - ☐ Morphine 2-5 mg. IV q 1-5 min., total = 30mg / hr and/or Morphine 10-15 mg. IM q 3 hr.
   - ☐ Meperidine 10-25mg IV q 1-5 min., total = 200mg. / hr and/or Meperidine 50-75mg IM q 3 hr. prn.
   - ☐ Fentanyl 25-50 ug IV q 1-5 min., total = 200 ug/hr. prn.
   - ☐ Numorphan 0.2-0.5 mg IV q 1-5 min., total = 1.5mg / hr and/or Numorphan 1.0-1.5 mg. IM q 2 hr. prn.
   - ☐ Other: _____
   - ☐ See PCA orders.
5. Nausea:
   - ☐ Droperidol .625-1.25mg IV ☐ May repeat X 1.
   - ☑ Reglan 10mg. IV prn ☐ May repeat X 1.
   - ☐ Ondansetron 1-4mg. IV ☐ May repeat X 1.
   - ☑ Promethazine 12.5mg IV ☐ May repeat X 1.
   - ☐ Other: _____
6. IV Fluid: Maintain present solution until complete (at _____ cc/hr) and then refer to surgeon's post-op orders.
7. Temperature persistently < 35 C: Forced air warming blanket.
8. Unable to void: Straight cath. prn. Notify M.D. if urine output is < 0.5cc/kg/hr.
9. Regional anesthesia:
   - ☐ Spinal or epidural narcotics - See epidural order form.
   - ☐ May discharge from PACU with sensory level below _____ or follow PACU guidelines.
10. Labs: ☐ Hct ☐ ABG ☐ Glucose ☐ CXR ☐ Other: _____
11. Notify anesthesiologist for uncontrolled pain, prolonged somnolence or any significant change in patient's condition. If unable, notify the on-call anesthesiologist.
12. Discharge when PACU discharge criteria are met. May send to floor with O_2 via nasal cannula at 2-4 L/min. to keep O_2 Sat >92%. May discontinue O_2 if O_2 Sat's remain >92% on room air for 15 min.

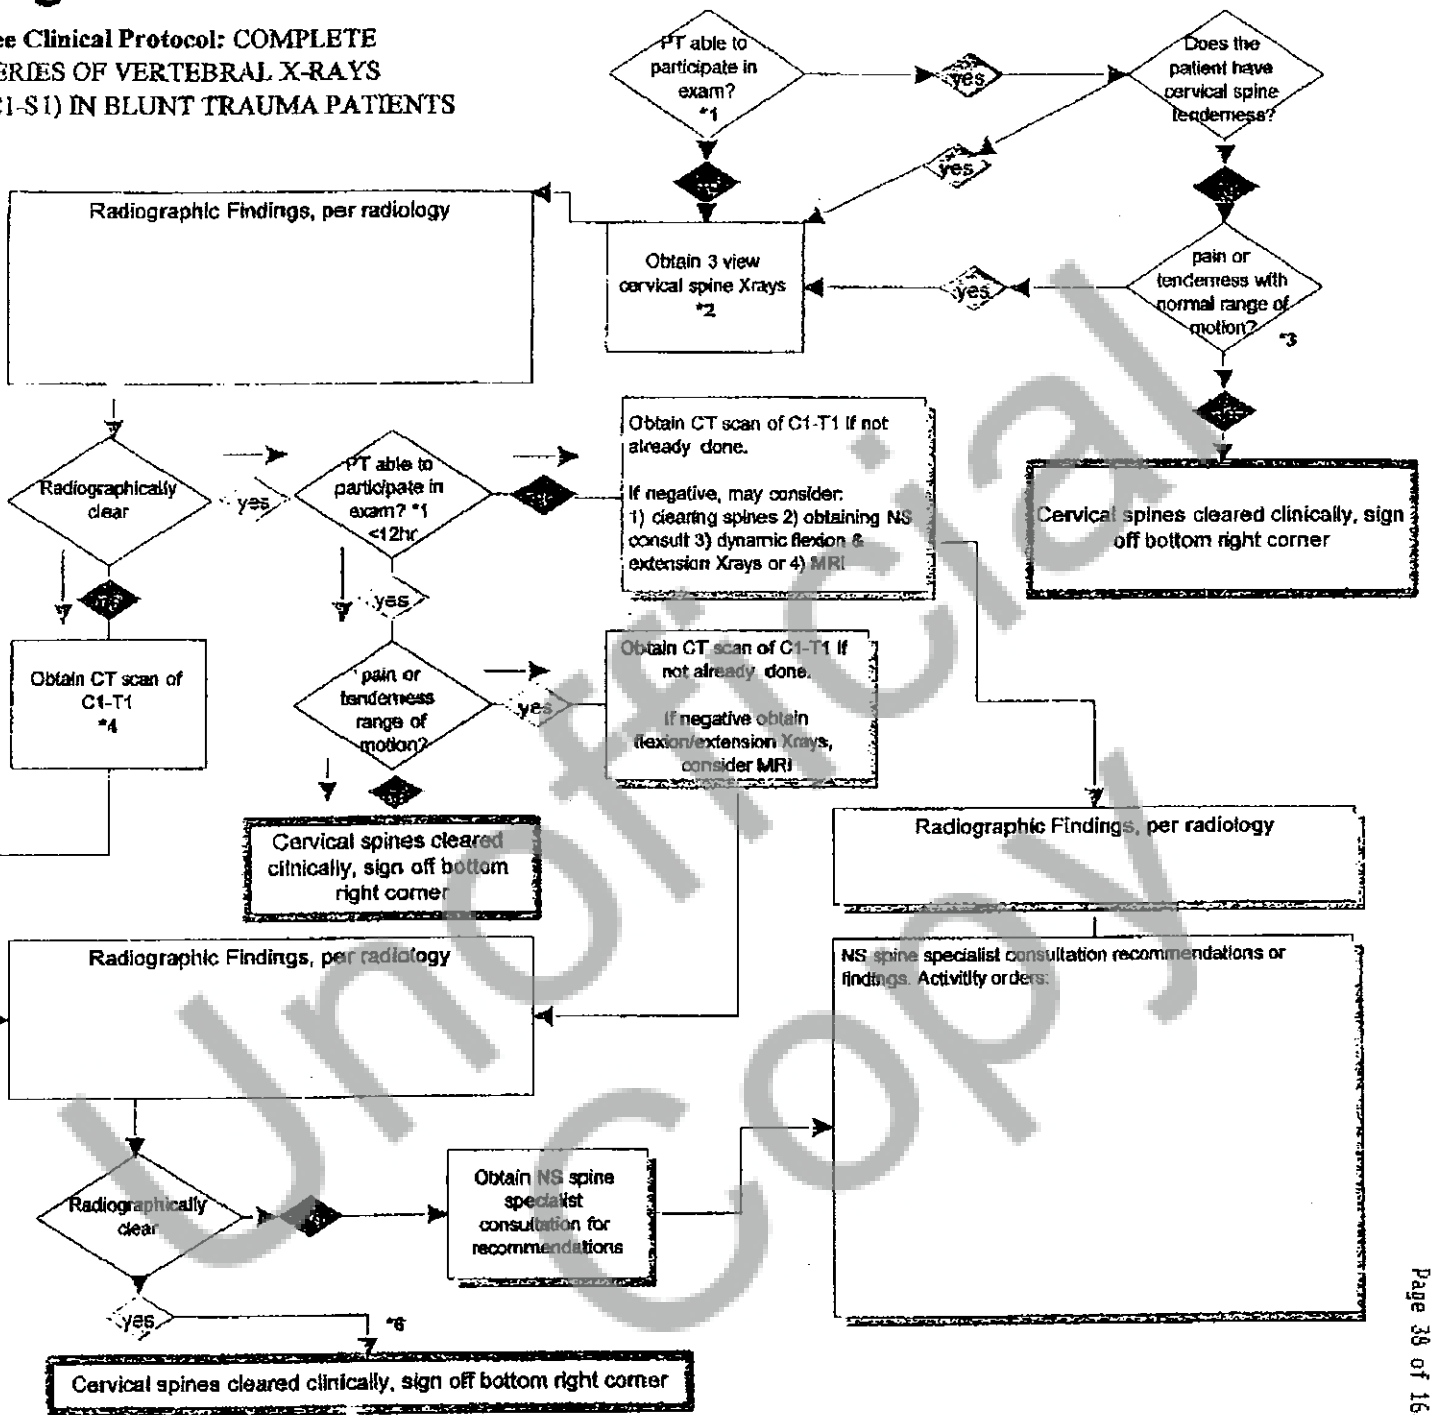
Cervical Spine Clearance Algorithm & Order Sheet

See Clinical Protocol: COMPLETE SERIES OF VERTEBRAL X-RAYS (C1-S1) IN BLUNT TRAUMA PATIENTS



*1 Able to participate in exam: Patients who are alert, awake, *compos mentis*, have no mental status changes, no neck pain on palpation or active range of motion, no distracting pain, and no neurologic deficits may be considered to have a stable cervical spine and no need for radiologic studies of their cervical spine.

*2 3 view Cervical spine Xrays: (1)Lateral view-base of occiput to top of T1 vertebrae (2) Antero-posterior (AP) view-exposing spinous processes of C2 through T1 (3)Odontoid-open mouth exposing lateral masses and entire odontoid process. A Swimmer's view must be obtained if the cervicothoracic junction is not seen on the first lateral cervical spine view, negating the need for repeated lateral views.

*3 Patients should not leave the ED with extrication collars in place. If the spines are not cleared, patient should be placed in Aspen or Philadelphia collar of appropriate size.

*4 Axial CT with saggital reconstructions through the affected area anytime plain films are inadequate, document fracture or suspected fracture

*5 Flexion/extension views must be done under direct surgeon or neurosurgeon supervision in the conscious and cooperative patient. See Clinical protocol: FLEXION-EXTENSION X-RAYS OF CHRVICAL SPINES IN AWAKE AND ALERT TRAUMA PATIENTS (ALL) Consider obtaining CAT scan of cervical spine, if not done.

*6 Recommend soft collar for comfort, advise no chiropractic treatment until F/U, RTC 1 week

Pediatric EMERGENCY DRUG DOSING 2003

Name *Justin Blouin*

Weight **75 kg**

Chart represents pediatric dosing by weight up to the usual adult dose

03-Sep-03

Drug	Strength	Dose	Route	Patient Dose	Volume	
Adenosine	3mg/ml	0.1mg/kg	IV / IO	6 mg	2 ml	Adult dose: up to 6mg Bolus for PSVT
Amiodarone *(Cordarone)*	50mg/ml	5mg/kg	IV / IO	150 mg 150 mg	3 ml 3 ml	up to 150mg Bolus for Pulseless VF/VT (5mg/kg) Dilute to < 2.5 mg/ml in D5W only Infusion over 20-60min for Perfusing Tachycardias
Atropine	1mg/10ml	0.02mg/kg	IV / IO	1 mg	10 ml	Minimum dose= 0.1mg (0.02mg/kg) Maximum dose= 0.5mg(child) 1mg(adolescent) MaxTotal Dose= 1mg(child) 2mg(adolescent, adult)
Calcium Chloride	100mg/ml	20mg/kg	IV/IO	500 mg	5 ml	up to 500mg. May be repeated in 10minutes dilute CaCl 1:1 with sterile water
Cardioversion		0.5-1 WS/kg		37.5 WS -	75 WS	
Defibrillation		2 WS / kg		150 WS		may repeat at 4 WS(joules) /kg x 2 if ineffective
Dextrose 25%	0.25g/ml	0.5-1g/kg	IV/IO	25 g - 25 g	100 ml 100 ml	max dose = up to 25g For PIV, dilute 1:1 with sterile water
Epinephrine 1:10000	1mg/10ml	0.01mg/kg	IV/ IO	0.5 mg	5 ml	up to 0.5mg in children, 1mg in adoles./adults
Epinephrine 1:1000	1mg/1ml	0.1mg/kg	ET Only!	5 mg	5 ml	up to 5mg
Flumazenil *(Romazicon)*	0.1 mg/ml	0.01 mg/kg	IV/IO	0.2 mg	2 ml	up to 0.2mg, may repeat in 45 sec. & then q minute up to a maximum total dose of 0.05 mg/kg or 1 mg
Lidocaine 1%	10mg/ml	1mg/kg	IV / IO	75 mg	7.5 ml	up to 100mg
Magnesium	500mg/ml	25mg/kg	IV / IO	2000 mg	4 ml	up to 2000mg IV for Torsades/Hypomagnesemia
Naloxone *(Narcan)*	1mg/ml	0.1mg/kg *(up to 2mg)*	IV / IO	2 mg	2 ml	up to 2mg maximum single dose.
NaBicarb 8.4%=	1mEq/ml	1mEq/kg	IV / IO	50 mEq	50 ml	up to 50mEq
NaBicarb 4.2%=	0.5mEq/ml	1mEq/kg	IV / IO	50 mEq	100 ml	for use in Neonates

Weight Verified by: _____ RN, _____ RN

TRAUMA CLINIC NOTE

CC:routine follow up

HPI: 16 yr old male who ran & fell through a plate glass door. Pt presented with a dressed right neck laceration, and a right knee abrasion.

PMH: I have reviewed the clinical record. The interval history is as noted in the ROS.

Social History:

Family History:

Medications:vicoden, Ibuprofen, Cuflax.

ROS: Systems reviewed, only positive findings recorded in patient record. Systems with negative findings did not contribute to the diagnosis or plan. ROS is negative Pt denies any pain/trouble with his head, neck, pulmonary, cardiovascular, Abdomen, GI, GU, or musculoskelatal systems.

VS: Per Flowsheet

PE: (X) indicates examination and findings on exam. Blank space indicates no exam undertaken/NA.

(x) Head- Normocephalic
(x) Eyes- Pupils equal and reactive to light and accomodation. EOM intact.
(x) Ears- Auricles symmetric, no lesions or deformities, nontender. External canals clear. TM's intact bilaterally with light reflex and landmarks intact. Hearing grossly intact bilaterally. Right TM had a very thin trace of dried blood.
( ) Nose- Patent, no septal deviation, mucosa pink without lesions or discharge.
(x) Throat- Lips without lesions. Gums pink, mucosa pink. .Uvula midline and no hoarseness. Pt states he has to tip his head downward slightly to swallow. He states that he feels like he has a knot in this throat. Tongue without lesions.
(x) Face- Symmetrical. Stitches present on right anterior to ear.
(x) Neck- Full ROM without pain, trachea midline, thyroid smooth and not

enlarged to palpation. Rises symetrically with swallowing. Zig-Zag scar on right neck down to right clavicle with staples, no erythema, pain.
(x) Pulmonary- Chest wall normal excursion. Auscultation for clear breath sounds without wheezes, crackles, rhonchi, or rubs.
(x) CV- Normal cardiac sounds without murmur.
(x) GI/Abd- Soft, nondistended. Bowel sounds present. No guarding, pain, or tenderness during palpation.
( ) GU- No urethral drainage or blood noted. External genitalia within normal limits.
( ) Pelvic- Stable, nontender, no lesions noted.
( ) Lymphatic- No adenopathy noted in axilla, neck, groin.
( ) Musculoskeletal- Normal symmetry, no crepitation or deformity. No tenderness, masses, effusions noted. Has full ROM without pain, deformity, or contracture.
( ) Skin- Intact, warm, dry, no rashes, lesions, or ulcerations.
(x) Neurologic- Alert and oriented X 4, mood and affect normal, cranial nerves II-XII grossly intact.
Labs/Xrays pertinent:

Assessment:s/p exploratory neck disection. laceration held together by stitches.

Plan/Medical Decision Making: Removed stitches. Removed staples and covered laceration with steristrips. Instructed patient to keep dry for next couple days. RTC if pt has pain, fever, chills, skin turns red, if there is bleeding from the neck site, or prn.

PT TYPE: EMI
DOB: 06/29/1987
ADM. DATE: 09/02/2003

ATTENDING PHYSICIAN: SETH D IZENBERG, MD

HISTORY OF PRESENT ILLNESS
This is a 16-year-old male who fell or ran through a plate glass door. He was reportedly getting a new license for a vehicle and for unknown reasons he said he fell through the door, though the other report said he ran through the door. He was brought in by the paramedics with visible vessels in the base of his wound.

Past medical history was negative. Allergies were negative. Past surgical history was negative. Past alcohol and tobacco are claimed to be negative. He did have a abrasion on his right knee, and he did have a laceration that was dressed on his right neck.

PHYSICAL EXAMINATION
VITAL SIGNS: As recorded.
HEENT: PERRL. EOMI. TMs clear. Face is stable.
NECK: A large laceration visible on the right side, to be further described below.
CHEST: Breath sounds equal bilaterally. Cor was regular.
ABDOMEN: Flat and nontender.
PELVIS: The pelvis was stable.
GENITOURINARY: Exam was negative.
RECTAL: Negative.
BACK: Negative.
NEUROLOGIC: Glasgow Coma Scale 15.

IMAGING STUDIES
Chest x-ray was negative. His neck and back were clear by mechanism.

LABORATORY DATA

Unofficial Copy

His laboratory exam was essentially within normal limits.

PROCEDURES
He did have a Foley catheter inserted under my direction, and then he was intubated, and we proceeded with neck exploration to be dictated by Dr. McGuigan. The description of the wound is as follows: The wound proceeded down through the platysma into the clavicular head of the sternocleidomastoid, and there were visible vessels deep in the wound that were visible on removal of the dressing. Further details are in the operative report by Dr. McGuigan.

PROBLEM LIST
Stab wound, right neck.

CATEGORY/SUBCATEGORY	FINDINGS	NOTE
SUMMARY OF PROBLEMS/NEEDS (CRC)	: Summary of problems or needs	

Pt is 16 yo male trauma pt brought to ED by Lifeflight secondary to running through a plate glass window et sustaining a lac to neck. Upon arrival he states that his father has legal custody et that he is living with friends secondary to a current restaining order obtained by him against his father. His father, Donald Blouin was notified at the scene by friends father. Mr. Blouin comes to the hospital with copy of paperwork withdrawing the "no contact order". Copy provided to security et copy made for chart. Mr. Blouin also provides hx that he et pt 's mother were awarded joint custody of pt as part of divorce agreement "years ago". Pt has continued to have contact with mother but has been in physical custody of father until 16th birthday(June 6/29/03). Mr. Blouin et other family members are attempting to notify pt's mother re: admit. Pt to be admitted to 3529. will leave VM for Shannon Boreson LCSW advising of above. Will also resolve issue of pt's legal name. He told us he was "Justin" but is registered as "Aaron. Question was raised re: accidental vs. purposeful injury et reports from the scene confirm accidental.

OPERATIVE REPORT

BLOUIN, JUSTIN
8500343400
3539 01
PT TYPE: EMI
DOB: 06/29/1987
ADM. DATE: 09/02/2003
SURGERY DATE: 09/02/2003

ATTENDING SURGEON: SETH D IZENBERG, MD

ASSISTANT: REBECCA MCGUIGAN, MD

PREOPERATIVE DIAGNOSIS
Stab wound, right neck and anterior auricular area.

POSTOPERATIVE DIAGNOSIS
Stab wound, right neck and anterior auricular area.

PROCEDURE PERFORMED
1. Exploration, right neck.
2. Exploration, right preauricular laceration.

COMPLICATIONS: None.
SPECIMEN: None.
ESTIMATED BLOOD LOSS: 150 cc.
INTRAVENOUS FLUID: 1600 cc.
ANESTHESIA: General endotracheal.

INDICATIONS FOR OPERATION: A 16-year-old boy who is said to have put his face through a plate glass window accidentally and had an approximately 6-cm laceration of the right neck and an expanding hematoma. The patient had no dysphagia or voice hoarseness, had a GCS of 15 and was neurologically intact throughout prior to the procedure.

INTRAOPERATIVE FINDINGS: Normal internal jugular and common carotid artery, without evidence of penetration of the carotid sheath and without

DOC # 20041557790
Page 158 of 163

evidence of penetration medially towards the trachea or esophagus. Multiple small bleeding vessels around the lacerated sternocleidomastoid muscle.

DESCRIPTION OF PROCEDURE: This is an emergency procedure and the patient was taken emergently to the operating room from the Emergency Department after noting the expansile hematoma in the right neck following the stab wound. A Foley catheter and nasogastric tube were inserted after induction of general anesthesia.

The laceration to the right neck was extended both superiorly and inferiorly to gain good exposure. There was a large hematoma that was evacuated. The vessels, including the common carotid artery and the internal jugular vein were exposed and clearly were uninjured. The stab wound did not penetrate into the carotid sheath and there was no penetration towards the esophagus or the trachea.

The wound was thoroughly irrigated. Of note, the sternocleidomastoid had been lacerated through and through by the injury. After thoroughly irrigating the wound and ligating all the small vessels along the muscle edges, very good hemostasis was assured.

The sternocleidomastoid muscle was approximated using 2-0 Vicryl in an interrupted fashion. A 7-mm Blake drain was placed beneath the sternocleidomastoid and brought out laterally and sutured to the skin using 4-0 nylon. The deep dermis was closed using 3-0 Vicryl in interrupted fashion. The skin was closed using skin staples. A sterile, dry dressing was applied.

Attention was then directed to the small laceration just anterior to the auricle on the right face, approximately 2 cm in length. There did not appear to be any foreign body within the wound and it was thoroughly irrigated and closed using 4-0 nylon in interrupted fashion. A sterile dry dressing was applied to this laceration as well. The patient was then extubated and taken to the recovery room in good condition.

Please note Dr. Izenberg was scrubbed and participated in the entire procedure.
