SURVEY NARRATIVE

The Oregon Lumber Company subdivision map was hand drawn in 1908. The west tier of twenty acre lots is shown as 1320.0 feet long east - west. The east tier of twenty acre lots is shown as 1386.0 feet long east - west. The map depicts a forty foot wide strip of land set aside for a road, separating said east and west tiers.

It appears from viewing said map drawing, that the forty foot wide road is not included in the lots. However, the actual length of the south line of said subdivision has been measured between existing monuments by Minister and Gleason (reference 6) to be 2704.67 feet. Since the actual length of said south line is very close to the original plat distance of 2706.0, a strong argument can be made that the centerline of the drawn 40 foot wide road serves as the lot lines.

The reference 6 survey and reference 2 short plat both prepared by Minister and Gleason document the position of the Cook - Underwood Road centerline as the original lot line. Terra Surveying and Trantow Surveying, also, have recorded short plats reflecting the Cook - Underwood Road as the original lot line.

Therefore, this survey holds the Reference 2, monuments set by Minister and Gleason as the control for locating the properly described in the deed recorded in book 134, page 80-81 of Skamania County records
