

SURVEY in $W\frac{1}{2}SW\frac{1}{4}$ Sec. 11, T2N, R7E, W.M.

TRAVERSE STATEMENT: A point to point traverse for the parcel shown was made with a Sokkia total station and related measuring equipment, all of which met State standards of WAC 332-130 at the time of this survey. Radial ties were made to monuments of record which provided the best evidence of the line to be flagged, painted and blazed.

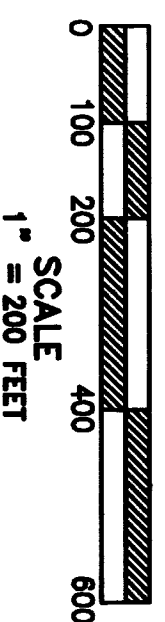

SURVEY NARRATIVE: Field work was conducted during the period of November 10 - January 3, 2006, the purpose of which was to mark the indicated lines to allow for timber harvesting. No monument could be found at the Southernly end of the marked line, and the record is unclear if such had ever been established. The point falls in a gully filled with a considerable number of jockstrawed windfalls. A monument was established on the South line of Section 11, West of the top of the gully.
