DECISION: Based upon the record and the Staff Report, the application by Elliot Andrea Chasse and Paul Fearne, described above, **subject to the conditions set forth in this Decision**, is found to be consistent with SCC Title 22 and is hereby approved.

Although the proposed development is approved, it may not be buildable due to inadequate soils for septic and/or lack of potable water. These issues are under the jurisdiction of Skamania County's Building Division and the Skamania County Health Department.

Approval of this request does not exempt the applicant or successors in interest from compliance with all other applicable local, state, and federal laws.

CONDITIONS OF APPROVAL:

The following conditions are required to ensure that the subject request is consistent with Skamania County Code Title 22. **This document, outlining the conditions of approval, must be recorded by the applicant in the deed records of the Skamania County Auditor** in order to ensure notice of the conditions of approval to successors in interest. SCC §22.06.120(C)(2).

- 1) As per SCC §22.06.120(C)(2), this Administrative Decision **SHALL BE RECORDED** by the applicant in the County deed records prior to commencement of the approved project.
- 2) All developments shall be consistent with the enclosed site plan, unless modified by the following conditions of approval. If modified, the site plan shall be consistent with the conditions of approval. (See attached)
- 3) All structures, except fences, including eaves, awnings and overhangs shall meet the following setbacks: **Front yard:** 50 feet from the centerline of the street or road or 20 feet from the front property line, whichever is greater. **Side yard:** 20 feet. **Rear yard:** 20 feet. Setbacks are established from property lines, not fence lines. If any question arises regarding the location of the property lines, the applicant shall be required to hire a professional land surveyor to locate the property lines and mark them with temporary staking prior to a building permit being issued. Staking must remain during construction and all building inspections.
- 4) Only that grading which is necessary for site development (building pads, utilities, etc.) is permitted. All graded areas shall be re-seeded with native vegetation prior to final inspection by the Planning Department.
- 5) Planted vegetation shall be maintained to ensure survival.
- 6) The vegetative landscaping shall, where feasible, retain the open character of existing pastures and fields.
- 7) For habitat purposes the existing conifers on the property shall be retained.
- 8) The Planning Department will conduct at least two site visits during construction, one to verify the location of the structures as stated by the Administrative Decision and a second to be conducted after all foundation excavation has been completed including framing footers, but prior to pouring

the foundation. A site visit for Final Inspection shall also be conducted. Each inspection may take up to four business days from the time of calling for the inspection. Inspections should be arranged by calling the Building Division at 509-427-3920.

- 9) The following procedures shall be effected when cultural resources are discovered during construction activities:
 - a) **Halt Construction.** All construction activities within 100 feet of the discovered cultural resource shall cease. The cultural resources shall remain as found; further disturbance is prohibited.
 - b) **Notification.** The project applicant shall notify the Administrator and the Gorge Commission within twenty-four (24) hours of the discovery. If the cultural resources are prehistoric or otherwise associated with Native Americans, the project applicant shall also notify the Indian tribal governments within twenty-four (24) hours.
 - c) **Survey and Evaluations.** The Gorge Commission shall survey the cultural resources after obtaining written permission from the landowner and appropriate permits from the DAHP. (See Revised Code of Washington 27.53) It shall gather enough information to evaluate the significance of the cultural resources. The survey and evaluation shall be documented in a report that generally follows the provisions in Section 22.22.030 of this Chapter. Based upon the survey and evaluation report and any written comments, the Administrator shall make a final decision on whether the resources are significant. Construction activities may recommence if the cultural resources are not significant.
 - d) **Mitigation Plan.** Mitigation plans shall be prepared according to the information, consultation and report provisions contained in Section 22.22.050 of this Chapter. Construction activities may recommence when conditions in the mitigation plan have been executed.
