Although the proposed development is approved, it may not be buildable due to inadequate soils for septic and/or lack of potable water. These issues are under the jurisdiction of Skamania County's Building Division and the Skamania County Environmental Health Division.

Approval of this request does not exempt the applicant or successors in interest from compliance with all other applicable local, state, and federal laws.

**CONDITIONS OF APPROVAL:**

The following conditions are required to ensure that the subject request is consistent with Skamania County Code Title 22. **This document, outlining the conditions of approval, must be recorded by the applicant in the deed records of the Skamania County Auditor** in order to ensure notice of the conditions of approval to successors in interest. SCC §22.06.120(C)(2).

- 1) As per SCC §22.06.120(C)(2), this Administrative Decision **SHALL BE RECORDED** by the applicant in the County deed records prior to commencement of the approved project.
- 2) All developments shall be consistent with the enclosed site plan, unless modified by the following conditions of approval. If modified, the site plan shall be consistent with the conditions of approval. (See attached)
- 3) All structures, except fences, including eaves, awnings and overhangs shall meet the following setbacks: **Front yard:** 45 feet from the centerline of the street or road or 15 feet from the front property line, whichever is greater. **Side yard:** 5 feet. **Rear yard:** 15 feet. Setbacks are established from property lines, not fence lines. If any question arises regarding the location of the property lines, the applicant shall be required to hire a professional land surveyor to locate the property lines and mark them with temporary staking prior to a building permit being issued. Staking must remain during construction and all building inspections.
- 4) In order to construct the rock retaining walls as proposed within the County's right-of-way along Ashley Drive (60 feet in width, or 30 feet from centerline), a County Right-of-Way Use Permit must be first obtained by the applicant.
- 5) Only that grading which is necessary for site development (building pads, utilities, etc.) is permitted. All graded areas shall be re-seeded with native vegetation prior to final inspection by the Community Development Department.
- 6) Planted vegetation shall be maintained to ensure survival.

- 7) The height of the remodeled single-family dwelling shall not exceed the height of the existing single-family dwelling as measured from the top of footer to roof peak, 21' 6" as indicated by the construction plans.
- 8) The addition/remodel shall be composed of non reflective materials or materials with low reflectivity. The proposed Hardi Plank siding and composition roofing materials meet this criterion.
- 9) All exterior lighting shall be hooded and shielded at a 90-degree angle. Hoods/ shields shall be made of nonreflective, opaque material, which does not allow light to pass through.
- 10) The exterior of the structure shall be allowed to match the existing single-family dwelling, tan siding, and dark gray roofing. If the applicant chooses to repaint the addition and house a new color it shall be dark earth tone in color.
- 11) The existing tree cover shall be retained as much as possible, except as is necessary for site development, safety purposes or as part of forest management practices.
- 12) Except as is necessary for site development or safety purposes, the existing tree cover screening the development from key viewing areas shall be retained. The fir trees along the eastern property line and the landscaped tree at the southeastern corner of the house shall be retained as screening trees, as marked on the site plan.
- 13) The applicant shall meet all conditions of approval enacted to achieve visual subordination prior to final inspection by the Community Development Department. The applicant is to coordinate all inspections with the Building Division. A final inspection approval will not be issued until compliance with all conditions of approval; including visual subordination criteria have been verified.
- 14) The Community Development Department will conduct at least two site visits during construction, one to verify the location of the structures as stated by the Administrative Decision and a second to be conducted after all foundation excavation has been completed including framing footers, but prior to pouring the foundation. A site visit for Final Inspection shall also be conducted. Each inspection may take up to four business days from the time of calling for the inspection. Inspections should be arranged by calling the Building Division inspection line at 509-427-3922 or through the permit center public portal at <https://co-skamania-wa.smartgovcommunity.com/portal/Public/Welcome>.

If the cultural resources are prehistoric or otherwise associated with Native Americans, the project applicant shall also notify the Indian tribal governments within twenty-four (24) hours.
  - c) **Survey and Evaluations.** The Gorge Commission shall survey the cultural resources after obtaining written permission from the landowner and appropriate permits from the DAHP. (See Revised Code of Washington 27.53) It shall gather enough information to evaluate the significance of the cultural resources. The survey and evaluation shall be documented in a report that generally follows the provisions in Section 22.22.030 of this Chapter. The mitigation plan shall accommodate the cultural and religious concerns of Native Americans. The cultural resource protection process may conclude when conditions set forth in Section 22.22.050(C) of this Chapter are met and the mitigation plan is executed.
