ADMINISTRATIVE DECISION

APPLICANT: Scott C. Wyse, Trustee of the William W. & Janet E. Wyse Family Trust
FILE NO.: NSA-23-34
DESCRIPTION: Removal of 220 sq. ft Bunkhouse and construction of 365 sq. ft. Bunkhouse
LOCATION: 702 Wauna Lake Club Rd, Lot #33 identified as Skamania County
Parcel no. #32-07-15-0-0-1533-00
ZONING: GMA –Large Woodland (F-2).
DECISION: Based upon the record and the Staff Report, the applicant's proposal,
described above, is found to be consistent with SCC Title 22 and is hereby
APPROVED subject to the conditions set forth below.

Although the proposed development is approved, it may not be buildable due to inadequate soils for septic and/or lack of potable water. These issues are under the jurisdiction of Skamania County's Building Division and the Skamania County Environmental Health Division. Approval of this request does not exempt the applicant or successors in interest from compliance with all other applicable local, state, and federal laws.

CONDITIONS OF APPROVAL:

The following conditions are required to ensure that the subject request is consistent with Skamania County Code Title 22. **THIS DOCUMENT, OUTLINING THE CONDITIONS OF APPROVAL, MUST BE RECORDED BY THE APPLICANT IN THE DEED RECORDS OF THE SKAMANIA COUNTY AUDITOR** in order to ensure notice of the conditions of approval to successors in interest. SCC §22.06.120(C)(2).

1. As per SCC §22.06.120(C)(2), this Administrative Decision **SHALL BE RECORDED** by the applicant in the County deed records before the commencement of the approved project.
2. The fire safety provisions for the Large Woodland (F-2) Zone listed in Skamania County Code Section 22.14.040(A) shall be held as CONDITIONS OF APPROVAL. The administrator shall conduct a review of the development within one year of final approval issuance to assure compliance with the SCC 22.14.040(A) fire safety provisions. A CONDITION OF APPROVAL shall state that no trees be removed within Wauna Lake resource buffer zone.
3. All development shall be consistent with the approved site plan on file with Skamania County Community Development unless modified by the following conditions of approval. If modified, the site plan shall be consistent with the conditions of approval.
4. The replacement structure will be used in the same manner and for the same purpose as the original structure. An inspection by planning staff is required to ensure this provision is met.
5. Grading which is necessary for site development (building pads, utilities, etc.) is permitted. Grading not necessary for building pad development is prohibited within the 75-foot Wauna Lake water resource buffer. All graded areas left bare shall be re-seeded with native vegetation before final inspection by the Community Development Department.
6. The following are the minimum required setbacks for all structures except fences: FRONT YARD: 20 feet front property line, 50 feet from the centerline of Wauna Lake Club Rd; SIDE YARD: 20 feet, and REAR YARD: fifteen 20 feet.
7. The exterior of the proposed structures shall be dark earth tones in color. The exterior includes but is not limited to, sides, doors, decks, gutters, roofs, and trim. The following colors are hereby approved: Siding-Hardie Plank Lap Siding color A4, A5, B4 or B5 located in the scenic handbook. Roof: Metal, Bruce & Dana Wholesale Inc-Forest Green. Doors: Metal Clad Wood, Pella, Bronze. Any proposed changes to these colors shall be submitted for review and approval by the Community Development Department for acceptably dark earth tones. Community Development Staff shall inspect the home for acceptably dark-earth colors before issuing final approval.
8. All exterior lighting shall be hooded or shielded at a 90° angle. Hoods/shields should be made of a non-reflective opaque material, which does not allow light to pass through.
8. Except for development approved in this administrative decision, the 75 ft. Wauna Lake water resource buffer shall be retained in its natural condition. Where buffer disturbance occurs during project development, revegetation with native vegetation shall be required and shall provide and maintain habitat diversity beneficial to the fish, wildlife, and native plants.
9. Best Management Practices shall be used during construction activities. The applicant shall utilize erosion control measures such as the installation of sediment fencing, distributing

straw mulch on exposed soils, and reseeding denuded soils, to prevent erosion of sediment into the water. All areas disturbed during the construction of the structure will be rehabilitated to the maximum extent practicable.

- 10 The Community Development Department will conduct at least two site visits during construction, one siting inspection to verify the staked location of the structures before any ground disturbance takes place; and a second to be conducted after all foundation excavation has been completed including framing footers, but before pouring the foundation. A site visit for Final Inspection shall also be conducted. Each inspection may take up to four business days from the time of calling for the inspection. Inspections should be arranged by calling the Community Development inspection line at 509-427-3922 or by emailing permitcenter@co.skamania.wa.us.
- 11 The height of the proposed accessory building shall remain below the forest canopy. All existing tree cover shall be retained as much as possible, except as is necessary for site development, safety purposes, or as part of an approved forest practices plan.
- 12 An Inadvertent Discovery Plan embodying the provisions of SCC 22.22.060 (Condition #9) and SCC 22.22.070 (Condition #10) shall be prepared and posted in a conspicuous place at the development site and shall remain posted until all project activities are concluded.
- 13 The following procedures shall be effected when cultural resources are discovered during construction activities:
 - a. Halt Construction. All construction activities within 100 feet of the discovered cultural resource shall cease. The cultural resources shall remain as found; further disturbance is prohibited.
 - b. Notification. The project applicant shall notify the Administrator and the Gorge Commission within twenty-four (24) hours of the discovery. If the cultural resources are prehistoric or otherwise associated with Native Americans, the project applicant shall also notify the Indian tribal governments within twenty-four (24) hours.
 - c. Survey and Evaluations. The Gorge Commission shall survey the cultural resources after obtaining written permission from the landowner and appropriate permits from the DAHP (See Revised Code of Washington 27.53). It shall gather enough information to evaluate the significance of the cultural resources. The survey and evaluation shall be documented in a report that generally follows the provisions in Section 22.22.030 of this Chapter. Based upon the survey and evaluation report and any written comments, the Administrator shall make a final decision on whether the resources are significant. Construction activities may recommence if the cultural resources are not significant.
 - d. Mitigation Plan. Mitigation plans shall be prepared according to the information, consultation and report provisions contained in Section 22.22.050 of this Chapter. Construction activities may recommence when conditions in the mitigation plan have been executed.
- 14 The following procedures shall be effected when human remains are discovered during a cultural resource survey or construction. Human remains mean articulated or

disarticulated human skeletal remains, bones, or teeth, with or without attendant burial artifacts.

- a. Halt of Activities. All survey, excavation, and construction activities shall cease.
- b. Notification. Local law enforcement officials, the Administrator, the Gorge Commission, and the Indian tribal governments shall be contacted immediately.
- c. Inspection. The county coroner, or appropriate official, shall inspect the remains at the project site and determine if they are prehistoric/ historic or modern. Representatives of the Indian tribal governments shall be contacted immediately and have an opportunity to monitor the inspection.
- d. Jurisdiction. If the remains are modern, the appropriate law enforcement official shall assume jurisdiction and the cultural resource protection process may conclude.
- e. Treatment. The procedures set out in RCW 27.44 and 68.05 shall generally be implemented if the remains are prehistoric/ historic. If human remains will be reinterred or preserved in their original position, a mitigation plan shall be prepared in accordance with the consultation and report requirements set out in Section 22.22.050 of this Chapter. The mitigation plan shall accommodate the cultural and religious concerns of Native Americans. The cultural resource protection process may conclude when conditions set forth in Section 22.22.050(C) of this Chapter are met and the mitigation plan is executed.

Dated and signed this 1st day of April 2024, at Stevenson, Washington.

Melissa Fahrni

Melissa Fahrni
Land Use Planner I

NOTE:

Any new development not included in the approved site plan on file with the Skamania County Community Development Department will require a new application and review.

EXPIRATION:

As per SCC §22.06.150(A), this Administrative Decision approving a proposed development action shall become void in two years if the development is not commenced within that period, or once development has commenced the development action is discontinued for any reason for one continuous year or more.

If the development does not include a structure the permit shall expire two years after the date the land use approval was granted unless the use or development was established according to all specifications and conditions of approval in the approval. For land divisions, "established" means the final deed or plat has been recorded with the county auditor.

If the development includes a **structure** the permit shall expire when construction has not commenced within two (2) years of the date the land use approval was granted; or once the structure has been started and if the structure has not been completed within two (2) years of the date of commencement of

construction the permit shall expire. Completion of the structure for this purpose means the completion of the exterior surface(s) of the structure; and compliance with all conditions of approval in the land use approval, including, but not limited to, painting of the exterior of the structure.

APPEALS:

The Director reserves the right to provide additional comment and findings of fact regarding this decision, if appealed.

This Administrative Decision shall be final unless reversed or modified on appeal. A written Notice of Appeal form must be filed by an interested person within 20 days from the date hereof. Appeals are to be made to the Skamania County Hearing Examiner, P.O. Box 1009, Stevenson, WA 98648. Notice of Appeal forms and mailing lists are available at the Community Development Department and must be accompanied by a \$2,450.00 nonrefundable-filing fee and a Certificate of Mailing.

The final determination of the Environmental Threshold Determination related to this underlying government action can be appealed to a court of competent jurisdiction, along with the underlying government action, only by the parties with standing to the Environmental Threshold Determination. If the underlying government action was exempt from SEPA review, this section does not apply.
